

Supplementary to Lecture 1

CS350

Fall 2018

Software is Eating the World

(Supplementary)

- 2011 & 2016, Mark Andreessen & Patel
 - [Software is eating the world](#)
 - *'Smart players do not necessarily build out their entire vision of the future from top to bottom.'*
 - *Netflix, Uber, Airb&b*
 - How has Uber been able to grow so fast and scale so quickly?
They saw the new reality of _____ — with every person, both driver and rider, having a connected computer in their pocket — and leveraged that new normal as a platform to bring people together in a way never before imagined or realized.'
- 2017, Nvidia CEO, MIT Technology Review
 - [Software is eating the world, but AI is going to eat Software](#)

Three aspects of Software Engineering

(Supplementary)

- *Give an example* of each aspect
- Which aspect is more *important*?
